I. Regulatory History

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under both 5 U.S.C. 553(b)(A) and (b)(B), the Coast Guard finds this rule is exempt from notice and comment rulemaking requirements because these changes involve agency organization and practices. In addition, good cause exists for not publishing an NPRM for all revisions in the rule because they are all non-substantive changes. This rule consists only of corrections and editorial, organizational, and conforming amendments. These changes will have no substantive effect on the public; therefore, it is unnecessary to publish an NPRM. Under 5 U.S.C. 553(d)(3), the Coast Guard finds that, for the same reasons, good cause exists for making this rule effective upon publication in the **Federal Register**.

II. Background

Each year the printed edition of Title 33 of the Code of Federal Regulations is recodified on July 1. This rule, which becomes effective June 10, 2009, makes technical and editorial corrections throughout Title 33. This rule does not create any substantive requirements.

III. Discussion of Rule

This rule amends 33 CFR parts 1 and 100 to affirm and clarify the delegation of authority by the Commandant to Coast Guard Captains of the Port to issue special local regulations.

This rule updates Coast Guard headquarters and field office designations, telephone numbers, and Web site addresses. These updates are non-substantive and are located throughout 33 CFR parts 70, 133, 135, 136, 137, and 138. Part 100 is amended to correct typographical and grammatical errors.

This rule amends 33 CFR part 110 to standardize the format of latitude/

longitude coordinates and better conform to the Government Printing Office (GPO) style.

The National Pollution Funds Center (NPFC) has changed the location within NPFC where a document entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", may be viewed by the public. The document has been relocated from Suite 1013 to the NPFC Law Library in Suite 1000. This rule amends 33 CFR part 137 to provide the public with this new location.

The authorities for 33 CFR parts 133, 136, and 137 have changed as a result of the Coast Guard's transfer to the Department of Homeland Security in 2003. This rule amends 33 CFR parts 133, 136, and 137 to reflect recent changes in the statutory authorities and delegations governing NPFC program regulations.

IV. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below, we summarize our analyses based on 13 of these statutes or executive orders.

A. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order.

B. Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this final rule will not have a significant economic impact on a substantial number of small entities.

C. Assistance for Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities.

The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. This rule does not require a general notice of proposed rulemaking and, therefore, is exempt from the requirements of the Regulatory Flexibility Act.

D. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Federalism

A rule has implications for Federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for Federalism.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

G. Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

H. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

J. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

K. Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

L. Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

M. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human

environment. Therefore, this rule is categorically excluded under section 2.B.2, figure 2–1, paragraph (34)(a) and (b) of the Instruction. This rule involves editorial, procedural, and internal agency functions. An environmental analysis checklist and a categorical exclusion determination are available in the docket where indicated under the **ADDRESSES**. We seek any comments or information that may lead to discovery of a significant environmental impact from this proposed rule.

SUPPLEMENTARY INFORMATION: M&J Construction Company of behalf of the bridge owner, Florida Department of Transportation (FDOT), has requested a deviation to the regulation of the Coronado Beach/George C. Musson (SR 44) Bridge across the Atlantic Intracoastal Waterway, mile 854.0, New

Smyrna, FL. The bridge provides a vertical clearance of 24 feet in the closed position. As required by 33 CFR 117.261(h), the bridge shall open on signal, except that from 7 a.m. until 7 p.m., each day of the week, the draw need only open on the hour, twenty minutes past the hour and forty minutes past the hour. The deviation is from 6 a.m. on June 30, 2009 through 6 a.m. on July 3, 2009. During the deviation this bridge will remain closed to navigation. Vessels not requiring an opening may pass at any time. This action is necessary because the bridge will be inoperable in a jacked-up state to perform repairs. The action will affect all vessels requiring an opening during this time period. Vessels unable to transit through this area may transit via an ocean route or schedule their transit prior to or after the repair work is completed.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: May 26, 2009.
